May 2022 - Present

- Contributed in building the website of annual Techno-cultural fest of VSSUT.
- Managed contests and events organized by The Web and Coding club of VSSUT in the annual Techno-cultural fest 2023.

## Projects

### Task App

[Link](#)

(MongoDB, Express, React, Node.js)

- Full-stack task management application built with the MERN stack, enabling users to efficiently create, update, and organize tasks.
- Responsive user interface with React, ensuring seamless user experiences and real-time updates between the front-end and back-end components across different devices and screen sizes.
- Implemented a robust user authentication system, allowing secure sign-up, login, and logout functionalities, enhancing the application's privacy.
- Progressive Web App (PWA) capabilities for an enhanced user experience, including transitions between online and offline modes and easy installation on mobile devices.

### Blind Code Interface

[Link](#)

(MERN stack)

- A web interface for the Blind Code Contest where participants will not be able to see the code they are typing.
- It has features like automatic submission of response on time up and on detecting browser tab switching or minimizing the browser, chances to see code for a limited number of times.

## Interests

**Playing Guitar** I'm a beginner but enjoy playing guitar a lot.

**Origami** Enjoy doing origami.
